ANDEAN AMERICAN MINING CORP.

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR THE THREE AND SIX MONTH PERIODS ENDED SEPTEMBER 30, 2008

(unaudited)

(Expressed in Canadian Dollars, except where noted)

1. Nature of Operations and Going Concern

Andean American Mining Corp. (the "Company") operates the Santa Rosa Mine, a heap leach facility to extract gold. Commercial production at the Santa Rosa Mine heap leach facility commenced in March 2002. The Company maintains an ownership interest in various other mineral properties in Peru, including the Sinchao properties, the Invicta properties, the Mamara properties and those properties adjacent to the Santa Rosa mine.

The amounts shown as mineral properties and deferred costs represent net costs to date, less amounts amortized and/or written off, and do not necessarily represent present or future values. The recoverability of these amounts and any additional amounts required to place these properties into commercial production are dependent upon certain factors. These factors include the existence of ore deposits sufficient for commercial production and the Company's ability to obtain the required additional financing necessary to develop its mineral properties.

As at September 30, 2008, the Company has negative working capital of \$2,526,564, negative cash flows from operations before changes in non-cash working capital of \$1,574,259, recorded a loss of \$2,250,078 for the six months and has an accumulated deficit of \$59,283,268. The Company is continuing in its efforts to generate sufficient cash from its operations or raise funds to meet its ongoing liabilities as they fall due. There can be no assurance that the Company will be successful in its efforts, in which case the Company may be unable to meet its obligations. Should the Company be unable to realize on its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the balance sheet. The consolidated financial statements do not give effect to any adjustments that might be necessary if the Company were unable to meet its obligations or continue operations.

2. Basis of Presentation

These interim unaudited consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements. These interim consolidated financial statements do not include all of the disclosure required by Canadian generally accepted accounting principles ("Canadian GAAP") for annual financial statements and should be read in conjunction with the audited consolidated financial statements for the year ended March 31, 2008. They have been prepared using the same accounting policies and methods as those used in the annual consolidated financial statements for the year ended March 31, 2008. These consolidated financial statements include the accounts of the Company and all its subsidiaries. The significant subsidiaries are:

- Sinchao Metals Corp, a British Columbia company (58% owned);
- El Misti Gold S.A.C. ("El Misti Peru"), a Peruvian company (100% owned);
- Invicta Mining Corp S.A.C. ("Invicta Peru"), (formerly Andean Explorations S.A.C.), a Peruvian Company (100% owned);
- Andean Exploraciones S.A.C. ("Andean Exploraciones"), a Peruvian Company (100% owned).

All significant inter-company balances and transactions have been eliminated.

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates in future periods could be significant.

3. Adoption of New Accounting Policies

Current Changes in Accounting Policies

On April 1, 2008, the Company adopted the following provisions of the Canadian Institute of Chartered Accountants ("CICA") Handbook Sections. There was no material impact on the Company's financial condition or operating results as a result of the adoption of these new standards:

- (a) Section 3862 – Financial Instruments – Disclosures, which replaces Section 3861 and provides expanded disclosure requirements that provide additional detail by financial asset and liability categories (see Note 16).
- (b) Section 3863 – Financial Instruments – Presentation, to enhance financial statement users' understanding of the significance of financial instruments to an entity's financial position, performance and cash flows (see Note 16).
- (c) Section 1535 – Capital Disclosures, which establishes standards for disclosing information about an entity's capital and how it is managed (see Note 15). Under this standard, the Company will be required to disclose the following:
 - qualitative information about its objectives, policies and processes for managing capital;
 - summary quantitative data about what it manages as capital;
 - whether during the period it complied with any externally imposed capital requirement to which it is subject; and
 - when the Company has not complied with such externally imposed capital requirements, the consequences of such non-compliance.
- (d) Section 1400 – General Standards of Financial Statement Presentation, to include requirements for management to assess and disclose an entity's ability to continue as a going concern (see Note 1).

Future Changes in Accounting Policies

- (a) International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for the publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after April 1, 2011. The transition date of April 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended March 31, 2011. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

- (b) Goodwill and Intangible Assets

In February 2008, the AcSB issued Handbook Section 3064, Goodwill and Intangible Assets and amended Section 1000, Financial Statement Concepts clarifying the criteria for the recognition of assets, intangible assets and internally developed intangible assets. Items that no longer meet the definition of an asset are no longer recognized with assets. The standard is effective for fiscal years beginning on or after October 1, 2008 and early adoption is permitted. The adoption of this new section is not expected to have a material impact on the Company's earnings and financial position.

6. Mineral Properties and Deferred Costs (Continued)

The Company has acquired mineral claims in Peru through option agreements and direct staking. As at September 30, 2008, the Company's property portfolio comprises approximately 55,200 hectares. The Santa Rosa property consists of 9,000 hectares, the Mamara property consists of 3,400 hectares and the Sinchao property consists of 1,300 hectares. The Invicta property comprises 41,500 hectares, of which 3,700 hectares were acquired under an option agreement from a subsidiary of Barrick Gold Corporation, Minera ABX Exploraciones S.A.

(a) Santa Rosa Mine

Accumulated costs included in the Santa Rosa mine costs are acquisition, exploration and development costs all of which are amortized or depleted using the units-of-production method.

(b) Sinchao Property

The viability of the Sinchao property has not yet been determined and the costs associated with the project are not being amortized.

(c) Invicta Property

The acquisition agreement with Minera ABX (Barrick) dated October 17, 2005 required the issuance of 500,000 shares to Barrick and payment of US\$315,000 in cash upon exercise of the option. The Company issued the 500,000 shares in October 2005 and paid US\$115,000 in November 2005 and the remaining US\$200,000 in April 2006.

The Company will also pay a 1% NSR, capped at US\$1 million, and a production payment of US\$50,000 per quarter capped at US\$800,000.

In order to maintain / earn its interest in its current portfolio of mineral properties, the Company must:

- Pursuant to the original Santa Rosa property purchase agreement, made the final option payments of \$734,226 during the year ended March 31, 2008.
- Pay a net smelter royalty ("NSR") of 0.8213% to the Production Debenture holders from the time of commercial production from the Santa Rosa Mine. In addition, for gold produced in excess of 175,000 ounces from the Santa Rosa Mine, the Company has agreed to pay a floating NSR of between US\$6.00 to US\$10.00 per ounce of gold produced, if the price of gold is higher than US\$320 per ounce, to the original claims holders from the Minera Paraccay acquisition within the Santa Rosa Property. It is expected that the floating NSR will not be payable before fiscal 2009.
- Pay annual fees of US\$3 per hectare to governmental authorities. The calendar 2007 holding costs are estimated to be approximately US\$60,000.

Certain of the mineral properties, if taken to production, are subject to various royalties as a percentage of either net profits from production or of net smelter returns.

10. Provision for Reclamation and Closure Costs

All of the Company's operations are subject to reclamation and closure requirements. Although the ultimate amount of site restoration costs is uncertain, on a regular basis the Company monitors these costs and together with third party engineers prepares internal estimates to evaluate their bonding requirements. The estimates prepared by management are then reconciled with the requirements of the Peruvian mining regulations.

At September 30, 2008, the accrued site closure liability amounted to \$131,573 (March 2008 - \$127,085). This was calculated using the fair market value of \$199,052, discounted at 10%.

In view of the uncertainties concerning future removal and site restoration costs, as well as the applicable laws and regulations, the ultimate costs to the Company could differ materially from the amounts estimated by management.

Future changes, if any, due to their nature and unpredictability, could have a material impact and would be reflected prospectively as a change in accounting estimate.

14. Segmented Information

The Company's only activities are the exploration and development of mineral properties and the operation of the Santa Rosa mine facility, all of which are in Peru. The principal assets in Canada consist of cash, accounts receivable and head office capital assets.

15. Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders, and to bring its mineral interest projects in Peru to commercial production.

The Company depends on external financing to fund its activities. The capital structure of the Company currently consists of common shares, stock options and share purchase warrants. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements, or sell assets to fund operations. Management reviews its capital management approach on regular basis. The Company is not subject to externally imposed capital requirements.

The Company invests all capital that is surplus to its immediate operational needs in short-term, liquid and highly-rated financial instruments, such as cash, all held with major Canadian financial institutions.

16. Financial Instruments

Categories of financial assets and liabilities

As at September 30, 2008, the carrying and fair value amounts of the Company's financial instruments are the same. The carrying value of the Company's financial instruments is classified into the following categories:

	September 30, 2008	March 31, 2008
Held for trading	(\$2,806,191)	\$1,742,438

The fair values of the Company's cash and cash equivalents, GST receivable, and accounts payables and accrued liabilities approximate their carrying values.

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest risk and commodity price risk.

(a) Currency risk

The Company's property interests in Peru make it subject to foreign currency fluctuations and inflationary pressures which may adversely affect the Company's financial position, results of operations and cash flows. The Company is affected by changes in exchange rates between the Canadian Dollar and foreign functional currencies. The Company does not invest in foreign currency contracts to mitigate the risks.

16. Financial Instruments (Continued)

(b) Credit risk

The Company's cash and cash equivalents are held in a Canadian and Peruvian financial institution (Peruvian Soles and US Dollar). The Company does not have any asset-backed commercial paper in its cash and cash equivalents. The Company's amount receivable consists primarily of goods and services tax due from the federal government of Canada.

(c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure.

Accounts payable and accrued liabilities are due within the current operating period.

(d) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of the cash and cash equivalents is limited because they are generally held to maturity.

(e) Commodity price risk

The ability of the Company to develop its mineral properties and the future profitability of the Company are directly related to the market price of gold. The Company has not hedged any of its future gold sales. The Company's input costs are also affected by the price of fuel. The Company closely monitors gold and fuel prices to determine the appropriate course of action to be taken by the Company.

17. Restatement

As at September 30, 2007, the Company should have recorded a Minority Interest of \$5,878,359 and a dilution loss on sale of shares by subsidiary of \$589,276. As a result of these corrections the net loss was increased by \$589,276. This has resulted in an increase in the reported deficit as at September 30, 2007. The effect of the restatement on the period ended September 30, 2007 consolidated financial statements is as follows:

18. Contingency

A previous participant in the Invicta (previously Victoria) Project has advised the Company that they retain a minority interest in the project. No legal claim has been initiated and the Company disputes that this previous participant holds any interest in the project. There are no legal rights for this participant in government registries in Peru. This participant failed to register its interests in Peru and thus is considered to have abandoned any interest in the Invicta project.

19. Subsequent Events

On November 17, 2008 the Company canceled 1,012,700 stock options. Of these stock options a total of 716,700 options were priced at \$0.85, 96,000 options were priced at \$1.10 and 200,000 options were priced at \$1.25. 715,000 had been issued to directors and officers of the Company.
