Invicta Project: Andean American Cuts 36.40 Meters of 5 gram/tonne Gold

Andean American Mining Corp. (TSX-V: AAG) is pleased to announce a 36.40 meter intercept grading 5.12 g/t gold, 45.42 g/t silver, 1.01% copper and interesting zinc and lead. The HQ diamond drill hole, known as AE-DDH-06-56, completed with 94% core recovery by TecDrill, was supervised by Qualified Person, Victor Jaramillo, P.Geo., of Discover Geological Consultants.

Drill Hole AE-DDH-06-56 intercepted from 133.25 to 159.75 meters (26.50 meters) a mineralized breccia zone composed of quartz, pyrite, chalcopryrite, hematite, galena and minor sphalerite. This drill hole also intercepted a smaller mineralized section from 124.30 to 126.65 meters. It is a quartz breccia structure with pyrite, chalcopryrite and minor galena and sphalerite. Analytical results are as follows:

From Meters	To Meters	Width meters	Gold g/t	Silver g/t	Copper %	Lead %	Zinc %
124.30	159.75	36.40	5.12	45.42	1.01	0.29	0.24
Including:							
124.30	126.65	2.35	4.98	127.52	0.96	0.42	0.22
and							
133.25	159.75	26.5	6.34	48.04	1.23	0.33	0.29
and							
146.00	159.75	13.75	8.07	81.29	1.86	0.46	0.22
and							
149.00	156.30	7.30	13.84	140.3	3.07	0.85	0.39

Geological and analytical results from this drill hole will add significantly to the current published indicated resources, both in terms of tonnage and grade. Analytical results for drill holes 52 and 58 are currently pending, and will be released as soon as they become available.

“These are the first results from the first diamond drill hole at the Invicta Drill program. We are pleased and look forward to the next assay results with anticipation,” states Chairman and CEO, John Huguet. “We are confident there is much more to learn about the geology and mineralization at Invicta.”

Diamond drilling continues at the Invicta Project, located 250 kilometers north and east of Lima in the western area of the Andes Mountain Range. More results will be available in coming weeks. Maps, cross sections and photos from this and future drillings will be available at www.andeanamerican.com.

All the above samples were submitted to CIMM Labs in Lima, for prep and analytical work. CIMM Labs is a Certified and Accredited Laboratory of International Standards.

The Qualified Person for this news release is Victor Jaramillo, P.Geo. of Discover Geological Consultants.

On behalf of Andean American Mining Corp.,

“John Huguet”
John Huguet
President & CEO

Andean American Mining Corp. (TSX.V-AAG) is focused on growth both organically and through acquisitions. The company is actively pursuing new properties in Peru with potential for early stage gold and silver targets. Andean American continues to maintain excellent community relations and a commitment to responsible environmental practices. The company has a strong management team with over 40 years experience and an effective board dedicated to excellence in corporate governance. Andean American Mining is committed to continuing to be a low-cost, profitable producer with an objective of 200,000 ounces of gold by 2010. For further information, please contact Sheera Waisman at 604.681.6186 or visit our website at www.andeanamerican.co
